“Wiggles N' Tunes musical arrangements provide a balanced musical diet for young children to grow on. Music FUN-damentals are interwoven throughout all the arrangements; there are even rhythm and tonal patterns on each CD, which encourage the children to learn these critical building blocks of the music language. Our music is Fun and Educational! It's Edu-tainment!” says award-winning children's performer Carolyn Zorn. “

Children were born to sing and they love to create sounds. From an infant cooing and gurgling to a toddler tapping on a pot with a spoon, music is evident in creative expression from the earliest ages and research has shown that musical ability disappears if it is not encouraged as early as possible.”
